

Project/Initiative sheet of the Terra Congo interface (translated from the original REDD+ registry entry in French)

Activity type	REDD+ project
Name	REDD+ project in the ERA conservation concessions in the Inongo Territory
Project leader	Ecosystem Restoration Associates
Main contact person	Bwangoy Bankanza
Institutional partners	Ministry of Environment, Conservation of Nature and Tourism
Technical partners	Wildlife Works Carbon
Financial partners	-
National status	Ratified
Project start date and Project end date	2011/2036
Administrative location	Territory of Inongo, Province of Bandundu
Budget (CAPEX)	-
Financing status (CAPEX)	Funded
Carbon finance and other ongoing income (OPEX)	Funded
Link with the national strategy (principal themes tackled within the 30 themes from the Strategy Construction)	<ul style="list-style-type: none"> • Forest micro-zoning • Conservation and protected forest • Actions to tackle illegal logging • Environmental services promotion and NTFPs • Increased productivity of subsistence agriculture and sedentary farmers • Agroforestry • Optimization of biomass energy activities • Alternative local energy
Description	<p>The project will be developed under the Verified Carbon Standard (VCS) and the Climate, Community and Biodiversity Standard (CCBS), in order to recognize the ecological and social project co-benefits.</p> <p>The project will comprise two distinct activities : improved forest management (IFM) and reduced emissions from deforestation and forest degradation (REDD+). The IFM part will promote the termination of commercial logging activities during the project lifetime.</p> <p>The REDD+ part of the project aims to reduce illegal logging and reduce unsustainable logging for agriculture and fuel-wood collection.</p> <p>The REDD+ part of the project will promote local community involvement, including the creation of conservation zones based on traditional land use, in collaboration with village representative committees. Activities such as agricultural diversification and intensification, improved cook-stoves and fuel-wood plantation will be used to enable communities to develop sustainable and diversified local economies while reducing the burden on the surrounding forests.</p> <p>Carbon revenues will be used to support communities in terms of infrastructure, including support for building schools and clinics, as well as improvements in transport infrastructure by boat in the area. Both REDD+ and IFM will be subject to the free, prior and informed consent (FPIC) of local communities.</p>
