Link with the national strategy (principal themes tackled within the 30 themes from the Strategy Construction)	<ul style="list-style-type: none"> • Conservation and protected forest • Actions against illegal logging • Afforestation/Reforestation & carbon stock enhancement • Optimization of biomass energy activities
Description	<p>The project aims to help reduce deforestation in the Virungas National Park and will implement new activities or enforce diverse activities already in place by focusing on three areas::</p> <ol style="list-style-type: none"> 1. Build the provincial capacity and implement sustainable wood resources management strategies 2. Enforcement of activities on wood energy supply and demand (<u>community reforestation, improved cook-stove, briquettes</u>): These activities target the creation of alternatives to deforestation and supporting the development of micro-entreprises benefiting rural and urban populations. 3. <u>The control of illegal exploitation of charcoal through the application of regulations</u>: strong support will be given to the Congolese Nature Conservation Institute (ICCN) to enforce activities against illegal exploitation of charcoal in the Park by armed groups.
Remarks	Delayed subsidies do not allow activities launch
