

Project/Initiative sheet of the Terra Congo interface (translated from the original REDD+ registry entry in French)

Activity type	REDD+ project
Name	Agroforestry REDD pilot project Sud Kwamouth
Project leader	NOVACEL sprl
Main contact person	Olivier Mushiete / <a href="mailto:olivier@mushiete.cd">olivier@mushiete.cd</a>
Institutional partners	Ministry of Environment, Conservation of Nature and Tourism
Technical partners	ONFinternational ( <a href="http://www.onfinternational.org">www.onfinternational.org</a> ), World Resources Institute ( <a href="http://www.wri.org">www.wri.org</a> )
Financial partners	CBFF/BAD
National status	Ratified
Project start date and Project end date	December 2011/ December 2036
Administrative location	Territories of Kwamouth, Province of Bandundu
Budget (CAPEX)	€4.437.729
Financing status (CAPEX)	Funded
Carbon finance and other ongoing income (OPEX)	Financing wanted
Link with the national strategy (principal themes tackled within the 30 themes from the Strategy Construction)	<ul style="list-style-type: none"> <li>• Agroforestry</li> <li>• Afforestation/Reforestation &amp; carbon stock enhancement</li> <li>• Optimization of biomass energy activities</li> <li>• Increased productivity of subsistence agriculture and sedentary farmers</li> <li>• Traditionnal and endogenous knowledge</li> <li>• Environmental services promotion and NTFPs</li> <li>• Increased productivity of small agriculture and small commercial livestock farming</li> <li>• Intensive agriculture and livestock</li> <li>• Actions to tackle illegal logging</li> <li>• Land tenure securitization and harmonisation</li> <li>• Land management</li> <li>• Law application and enforcement</li> <li>• Peasant and rural organization</li> <li>• Control of migrations and demographic pressure</li> </ul>
Description	<p>This project will be implemented by a consortium lead by the Novacel society in the Boku area on the Batéké plateau (South of Kwamouth territory). It links in with the activities coordinated by the IBI Batéké agroforestry activities for several years under the Clean Development Mechanism. The project aims to stimulate a transformation which will allow 10,000 rural families to undergo a process of economic and social transformation based on the implementation of 10,000ha of agroforestry plantation, fulfilling at the same time their daily needs and assuring a sustainable management of resources and the supply of Kinshasa with basic products.</p> <p>The project will be implemented in four phases:</p> <ol style="list-style-type: none"> <li>1. Sites research and participative cartography, launch of an information management system (collection, analysis and dissemination of activities and the launch of the MRV system);</li> <li>2. Installation of basic infrastructure;</li> <li>3. Implementation of agroforestry activities;</li> <li>4. Implementation of activities targeting commercialization, distribution and transformation</li> </ol>

Remarks	To start, the project is expected to be initially financed by the Congo Basin Forest Fund. Activities will be developed over three years respecting production cycles (preparation, plantation, harvest). The same schedule will be respected in each station and will follow the following implementation steps.
